## Face Verification and Explainability | Input Image | | Shart Chart Continue | | Main Characteristics | | Shart Chart Continue | | Yes, 95 %

Prompt Configuration

Are both images from the same identity?
Explain why.

The facial features such as the shape of the face, eyes, nose, and lips appear to be very similar in both images, and the hair color and style are also closely matching which makes me quite certain they are of the same person.

Face Verification & Explainability Output

## **Soft-Biometrics Estimation**
